MirBot: A Multimodal Interactive Image Information Retrieval system

Antonio Pertusa
MIRBOT
Recent advances

- Dataset migrated to mySQL
- More metadata available (although still unused)
- Image classification enhanced with color histograms
- App bug fixes and complete requirements
- Project webpage (almost finished)
- Data interface in the server side
Current state

• Beta-test on iphone, ipod touch (volunteers?)

• Project to be submitted to the App Store by the end of next week (after the user tests)

• http://mirbot.com/webpage
